

PREVIEW · SAMPLE PAGES

THE PRICING WORKBOOK

A guided workbook for reasoning about costs, capacity, scope, and price.

This is a 4-page preview of a 24-page printable workbook.

The full workbook includes three worked scenarios and a discount-decision checklist.

SAMPLE PAGE 01

01

EFFECTIVE-CAPACITY WORKSHEET — SAMPLE

Effective capacity is the number of hours per year you can actually bill. The workbook walks you through five inputs and produces a single number. The sample below shows the worked example for a fictional independent designer in year three of practice.

A	Working hours per week	32
B	Weeks worked per year	46
C	A × B = gross working hours	1,472
D	Non-billable load (% of C)	45%
E	C × (1 - D) = effective capacity	809 hours

The full worksheet includes a notes column for the reasoning behind each number — so that next quarter you can revisit your assumptions instead of starting from scratch.

SCOPE-COMPLEXITY MULTIPLIER — SAMPLE

The multiplier adjusts the floor price to the project. The sample shows the full five-level table; the workbook adds a notes column for what pushed a specific project up a level.

LEVEL	PROFILE	MULTIPLIER
1.0	Returning buyer · home discipline · one decision-maker · no fixed launch.	1.0×
1.2	Returning buyer · adjacent discipline · two decision-makers · internal-only.	1.2×
1.4	New buyer · home discipline · two decision-makers · internal-only.	1.4×
1.7	New buyer · adjacent discipline · three stakeholders · soft launch.	1.7×
2.0	New buyer · unfamiliar industry · 3+ stakeholders · fixed public launch.	2.0×

The workbook's full version includes a second table for "project conditions" — five yes/no questions that nudge the multiplier up or down (e.g., "buyer has done this kind of project before").

DISCOUNT-DECISION CHECKLIST — SAMPLE

The discount-decision checklist is the page you reach for when a buyer asks, "Can you do it for less?" It turns the question from a feeling into a written decision.

- ☐ Is the buyer a fit for the offer, with the inputs and decision-maker in place?
- ☐ Is the requested price at or above the floor for this project ($P \times 1.0$)?
- ☐ Is there a stated reason for the discount the buyer can name back to you?
- ☐ Does the discount preserve the target multiplier for at least one stakeholder?
- ☐ Is the discount framed as a choice with a trade-off the buyer accepts (smaller scope, longer timeline, case-study rights)?
- ☐ Is the discount documented in writing, with the reason attached, so it does not become the new floor?
- ☐ If you decline, have you named a smaller scope at the buyer's budget instead?
- ☐ Have you waited at least 24 hours between the request and your reply?

A discount is not a price cut. It is a written agreement about what changed in exchange.

Margin / Form is a fictional creator business. This is a demonstration resource.
